

Attention Dapsone 7.5% Gel Users

Please read the important message below regarding operation of the Dapsone Gel Pump

- Plastic in the pump opening should not be altered, there is NOT a seal that needs to be removed
- The design of the pump requires that the plastic remain intact or the pump will not function properly
- Allow approximately 5 seconds between pump strokes in order to prime the pump
- It may take several strokes before the pump is primed

If you encounter issues when using the product, you can contact Taro Drug Safety at 1-866-923-4914
